Alberta Economic Development and Trade leads the development, coordination and implementation of the provincial government's economic diversification strategy. Via four major working divisions, the department strives to maintain a climate conducive to investment, foreign and domestic trade and the establishment of new businesses.

The divisions (Small Business and Industry, Business Finance and Investment, Policy and Planning, and Trade) offer a multitude of programs and initiatives and are supported by Finance and Administration, and Human Resources branches. Acting as a separate entity, yet responsible to the department, the Office of the Commissioner General for Trade and Tourism also promotes trade and supports the province's economic development.

With 77% of Canada's conventional oil, 91% of its natural gas and all of its bitumen and synthetic reserves, Alberta companies have been spurred on to develop innovative new methods to explore, produce and process oil and gas. So successful have they been that we now export experience and technology to a myriad of countries around the world. Energy also has been the catalyst for growth in other industries, playing a vital role in Alberta's economic development and diversification.

The information contained in this directory has been obtained from sources believed to be reliable and every attempt has been made to accurately represent this significant industry to potential buyers on all continents.

Alberta Economic Development and Trade will distribute this Directory in key locations including Alberta's foreign offices, international trade shows, and trade and investment missions.

WE'RE NOT JUST DESIGNING MOBILE COMMUNICATIONS, WE'RE MAKING HISTORY.

AGT Private Mobile Systems, for more than 40 years, has cultivated a team of skilled engineers and designers who have pioneered the development of some of the world's most innovative, high-performance communication systems. Now, after a recent restructuring, we are pursuing national and international markets.

EMDMRS (Enhanced Multi-Departmental Mobile Radio System), our newest trunked system with expansion capabilities beyond 10,000 users; SCADA (Supervisory Control and Data Acquisition) networks; point-to-point; and custom-designed systems are representative of the advanced technology, intricate teamwork and dedication to service and support that goes into every system we create.

AGT Private Mobile Systems.
The solution to mobile communications is simple when you have the talent.

GN CORPORATIONS INC. has been in the oil and gas industry for over 25 years. In that time, **GN** has established its own lines of low and high pressure oilfield equipment, wireline equipment and trucks, and downhole tools.

General Line of Oilfield Equipment

- **Connections** (Y's, T's, Laterals, Elbows, Crosses, Goat Heads, Crowsfoot)
- **Hammer Unions**
- **Treating Iron/Flow Line**
- **Check Valves**
- **Flanges**

Specialized Line of Oilfield Equipment

- **Ball Injector** (Ball Gun)
- **Radioactive Gel Injector**
- **Treesavers**
- **Camlock Couplings**

The specific manufacturing achievements are only a part of the diversified services **GN** has to offer.

Thanks to the special skill of our engineering department and our flexible manufacturing capabilities, **GN** is able to custom design and manufacture your production needs.

Also, we have in-house heat treating facilities and a quality assurance program that meets the needs of the oil and gas industry that **GN Corporations Inc.** proudly services . . . .

"Quality Is Our Business".

DAILY OIL BULLETIN

The source you can depend on.

Since 1937 fast accurate information, statistics, trends and industry opinion have made the DAILY OIL BULLETIN the one source the oil industry can depend on to stay on top of the market.

Every day the BULLETIN reports on exploration in Canada and around the world, reports on government news, land sales, and important late breaking stories behind the headlines.

The Drilling Report keeps daily track of all well drilling in Canada from start to completion. Monthly and quarterly statistics on industry expenditures, land sales, drilling activity and production are all part of the total information available from the industry's most used newsletter.

Become one of the informed – write or phone for subscription information. Calgary: (403) 244-6111.

Western Research

A member of the BOVAR group

Caring for the Environment Through Engineered Solutions

The services of Western Research are of great importance to industrialized nations.

Western Research is a high technology company specializing in environmental control, and emission monitoring plus control instrumentation for industry. It is a member of the BOVAR group, with its headquarters in Calgary, Alberta, Canada and 24 regional offices and agents around the world.

The company's strength is inherent in its technical problem solving ability. Twenty-five years ago when the sulphur recovery and gas processing industry in Canada was in critical need of environmental control, Western Research moved into the arena. Extensive research applied to meeting stringent emission control standards has produced a series of technological landmarks. The company is now a world-class leader in the development of the analytical tools, process analysers and the environmental and process engineering expertise to aid industry in meeting the 1990's environment and process needs.

Western Research, under the exacting standards of regulatory bodies throughout North America and Europe, has developed analytical technology of a high quality. The company's problem solving approach achieves an efficiency increase in industrial processes and reduces the release of chemicals to the environment.

In light of increasing public concern and awareness of continuing environmental damage, the services of Western Research are of great importance to industrialized nations. Reducing levels of emissions such as sulphur dioxide and hydrogen sulphide is vital to minimize air pollution and reduce acid rain.

Western Research is dedicated to providing quality services and products, thus building and reinforcing the corporate profile. Research and development has enabled the company to offer the first comprehensive air pollution control service and achieve its position as leaders in process performance evaluation, emission monitoring, and environmental assessments and consultation.

Process Analytical Services

The Process Analytical Services division is responsible for the design and marketing of process instrumentation as well as providing problem solving services to industry to help increase process efficiency.

The current line of process instruments includes Continuous Stack Emission Monitors, Air Demand Analysers, Sulphur Dioxide Monitors and Sales Gas Monitors. There are also a number of more recent additions to the products available such as the Total Reduced Sulphur Monitor and the Hydrogen Sulphide in Amine Monitor.

In addition to technical and engineering support, the Process Analytical Services division also offers a sulphur plant simulation software product, Sulsim®, and runs a regular series of scientifically-based, industry oriented seminars at several locations around the world. The European workshop on sulphur recovery by the modified Claus Process is held annually in Budapest, Hungary each November.

Environmental Consulting and Technical Services

Western Research is prepared to respond to the challenges of the environmental issues of the '90s through systematic evolution of more advanced analytical and testing technology and through the deployment of qualified and motivated environmental engineers and scientists.

The Environmental Engineering Division concentrates on the area of environmental consulting and technical services. This expertise includes diffusion meteorology, automated air quality monitoring, environmental assessments, biophysical monitoring, hazardous waste management, site remediation, waste incineration, source testing and analytical services. Western Research offers its expertise to both industry and government, giving objective advice on environmental issues and the impact on industries.

Western Research European Operations

Western Research has been providing expertise and product to countries in Europe for more than 10 years through a network of representatives in eight countries. The company recently opened an office in Hattersheim, Germany, approximately 10 kilometres west of Frankfurt.

In preparation for "Europe 1992," when the European Economic Community becomes one of the largest markets in the world, Western Research is ensuring it is well positioned to continue marketing throughout Europe.

Through its multifaceted services, Western Research is able to offer a rounded, quality service to both its clients within the industry and to governmental bodies. With the development of the Eastern European markets and the growing awareness of environmental issues, Western Research will continue as a leader in this field in the future.

Province of Alberta

Department of the Attorney General
Bowker Building
9833 - 109 St.
Edmonton, AB
T5K 2E8
Ph. (403) 427-2339
Attorney General: Ken Rostad
The department was established when the Alberta government was formed and is the branch of government concerned with law in the province. The department is split into three sections: civil, criminal and constitutional and energy. Some of the responsibilities of this department are: drafting of provincial legislation, land titles, and personal property registration which includes oil wells and ships.

Department of Economic Development and Trade
12 Fl., 9940 - 106 St.
Edmonton, AB
T5K 2P6
Ph. (403) 427-0670
Fax: (403) 422-9107
Minister: Peter Elzing
Deputy Minister: A.G. McDonald
The department leads the development, coordination and implementation of the provincial government's economic diversification strategy. Via four major working divisions, the department strives to maintain a climate conducive to investment, foreign and domestic trade and the establishment of new businesses. The divisions (Small Business and Industry, Business Finance and Investment, Policy and Planning, and Trade) offer a multitude of programs and initiatives and are supported by Finance and Administration and Human Resources branches. Acting as a separate entity, yet responsible to the department, the Office of the Commissioner General for Trade and Tourism also promotes trade and supports the province's economic development.

Department of Energy
10 Fl., 9945 - 108 St.
Edmonton, AB
T5K 2G6
Ph. (403) 427-3590
Minister: Rick Orman
Deputy Minister: M.F. Kanik
The department performs four basic functions: it disposes of mineral rights and administers mineral agreements on behalf of the crown; it provides policy recommendations and advice on energy to the government; it advises on, establishes and administers the fiscal regimes and royalty system through which the government obtains its fair share of Alberta's resources (including the negotiation of fiscal and royalty regimes for the major energy projects); and it administers energy-related research, development and conservation programs.

Department of Transportation and Utilities
208 Legislature Building
Edmonton, AB
T5K 2B6
Ph. (403) 427-2081
Minister: J. Allen Adair
Deputy Minister: H.M. Alton
In 1986 the Department of Transportation was enlarged to include utilities. The utilities portion is responsible for administering the rural gas program, programs related to rural electricity services and for financial assistance programs for municipal water supplies and sewage treatment facilities.

Alberta Oil Sands Equity
11 Fl., 9945 - 108 St.
Edmonton, AB
T5K 2G6
Ph. (403) 427-2492
Chairperson: T.R. Vant
This unincorporated agency was established in 1975 to manage Alberta's equity investment in the Syncrude project. Its role has since expanded to cover the management of Alberta's equity in other heavy oil and oil sands projects such as the Lloydminster Bi-Provincial Upgrader Project, OSLO Commercial Project, and the OSLO New Ventures Project.

Alberta Oil Sands Technology and Research Authority
500, 10010 - 106 St.
Edmonton, AB
T5J 3L8
Ph. (403) 427-7623
Chairperson: W.J. Yurko
The authority is a provincial crown corporation established in 1974 to assist, promote and encourage research necessary to develop new oil sands technology; to compile, assess and disseminate technological information relative to oil sands deposits and products; to promote co-operation among the government of Alberta, universities, industry and other institutions and agencies; and to solve the problems impeding production capacity to meet the demand for crude oil, synthetic crude oil and associated products.

Alberta Petroleum Marketing Commission
1900, 250 - 6 Ave. S.W.
Calgary, AB
T2P 3H7
Ph. (403) 297-5501
Chairperson: Dale Lucas
The Commission was established in 1974 to secure provincial jurisdiction over oil and gas and to establish a process for the distribution of revenue from export sales. Now the APMC acts as sales agent for the crown's royalty share of petroleum from crown leases and offers marketing services to producers. In addition, the APMC collects natural gas sales statistics, offers administrative services to natural gas marketers, and represents the Alberta government at extra-provincial regulatory proceedings.

Energy Resources Conservation Board
640 - 5 Avenue S.W.
Calgary, AB
T2P 3G4
Ph. (403) 297-8311
Fax: (403) 297-3381
Co-Chairpersons: F.J. Mink and J.P. Prince
The board was established by the Alberta government to regulate the responsible, safe, and efficient development of Alberta's energy resources including oil, natural gas, oil sands, coal, electrical energy, and the pipelines and transmission lines to move resources to markets.The board's three main functions are: evaluating and deciding on applications for new or expanded energy projects, including related work inthe areas of public involvement and public hearings; regulating existing energy facilities to ensure they operate efficiently, avoiding waste and controlling pollution; and providing advice, information and statistics to the public, the government, and the energy industry about Alberta's energy resources.

Public Utilities Board
11 Fl., 10055 - 106 St.
Edmonton, AB
T5J 2Y2
Ph. (403) 427-4901
Chairperson: A.C. Barfett
The board is an independent quasi-judicial tribunal established in 1915 to regulate public utilities in Alberta. Investor owned electric and gas utilities in the province come under the board's jurisdiction. It regulates agreements between municipalities and utilities. The board also acts as the appellate tribunal for the Alberta Petroleum Marketing Commission's setting of the Alberta Cost of Service. Rural gas utilities may also appeal franchise boundary decisions to the board.

Have We Got Equipment!

When it comes to field equipment, we're our toughest critic. No matter what the job...no matter what the climatic conditions... no matter what the terrain...our equipment HAS to work hard...and it HAS to work properly.

We've spent years perfecting equipment, manufacturing to exacting specifications, designed to PERFORM.

It performs in all kinds of diverse conditions that range from the heat of The Middle East desert to northern Alaska and the Siberian arctic.

Despite the excellence we've attained, we continually work to improve every piece we manufacture. Make it more reliable, effective and easier to operate...always with safety being a number one priority.

If we make it...you can ***COUNT ON IT.***
